EDUCATION

Higher School of Economics, Bachelor   2021 - 2025 (Present)
Software engineering

Relevant Coursework: Algorithms and Data Structures, Computer Architecture and Assembly Language, Databases, Foundations of Operating Systems, Java Programming, Formal Languages and Translations.

Professional development: Python for automation and data analysis   Dec 2022 - May 2022

TECHNICAL SKILLS

Programming languages: Java, Python, C++, C, Assembler NASM - x86, SQL
Technologies and Frameworks: Maven, JUnit, Swing, JavaFX, Django, Docker, Docker Compose, Numpy, Sympy, Git, Gitlab
Databases: Microsoft SQL Server 2012, MySQL, PostgreSQL

EXPERIENCE

Lecturer's Teaching Assistant, Discrete Math   Sep 2022 - July 2023 (Present)
- Assisted the lecturer in preparing course materials, grading assignments
- Provided support to students in understanding complex discrete mathematics concepts and solving problems
- Collaborated with the lecturer to develop effective teaching strategies and improve student engagement

Teaching Assistant, Computer Practicum on Mathematical Analysis in Python   Sep 2022 - April 2023
- Provided support to students in learning mathematical analysis techniques using Python programming
- Served as a point of contact for students with questions, concerns, or seeking additional guidance related to Python programming and mathematical analysis

ADDITIONAL INFORMATION

- Language: Russian (native), English (B2).
